**PACKAGING IMPACTS CONSULTATION REGULATION IMPACT STATEMENT -
LOCAL GOVERNMENT SUPPORT FOR BEST PRACTICE CONTAINER DEPOSIT
SCHEME**

I wish to express the support of my Council for the introduction of a best practice Container Deposit Scheme (CDS) to address post-consumer packaging waste impacts in Australia.

Local Governments in Western Australia play a significant role in the collection, treatment and disposal of materials within the Municipal Solid Waste stream, including post-consumer packaging waste. Local Governments undertake a variety of waste collection services including regular kerbside waste and recycling collection and periodical bulk waste collection and as a result are responsible for the management and operation of a large variety of waste management infrastructure.

In addition, Local Governments and Regional Councils also develop and implement waste education strategies; undertake intensive community engagement on waste management in local areas; and carry out regular litter and illegal dumping clean ups, as well as the collection of waste from community events. Local Governments are also increasingly being required to undertake an enforcement role, particularly in regard to litter and illegal dumping prosecutions.

The current assumption that Local Government can continue to provide services for all waste, and in particular post-consumer packaging waste, is not sustainable. Local Government supports the introduction of a scheme that compels producers to think through the life cycle of their product, considering waste minimisation and intelligent product design and ensuring there are disposal or recycling options available.

In terms of the options presented in the Packaging Impacts Consultation Regulation Impact Statement, the City of Swan considers that the CDS options (4a and 4b) are the options most likely to improve resource recovery, achieve a more appropriate sharing of waste management costs; reduce litter; and increase community awareness and involvement in waste management.

The City of Swan strongly supports the introduction of a CDS as the chosen approach to effectively address the increasing volume of litter and low recycling rate of post-consumer packaging waste. The City of Swan looks forward to the COAG Standing Council on Environment and Water's support for the introduction of a CDS nationwide.

Thank you for the opportunity to comment on a proposed option to addressing post-consumer packaging waste in Australia. If you have any questions regarding this matter please contact Mr Jim Coten, Executive Manager Operations, City of Swan, on (08) 9267 9105.

Yours sincerely

Cr C Zannino
